1.1.2.. Assessing the technical level of the company:

Description of the main products and / or services provided, specifying:

a) the main market for each product or service and the distribution methods;

In Romania, for a series of products of the current manufacturing range, the UAMT company is the main supplier of domestic automobile manufacturers. However, it is

S.C. "UAMT" S.A. ORADEA

noteworthy that there is a tendency to intensify competition in the field of activity of society, which requires from society a determined action to counteract this phenomenon through an active policy of upgrading and modernizing the products.

This is possible with the help of convenient sources of funding, namely from non-reimbursable loans from the European Union or from the Romanian Government.

The main products of the company are:

- Stamped landmarks;
- Anticorrosive protected highlights by electrochemical coating or painting by the cataphoresis process;
- Car components;
- SDV;
- Car parts.
- Injected landmarks

The market for the company is divided into three main segments:

- industrial customers:
- vehicle installers:
- customers for auto parts:
- service and trading companies;
- Customers for SDVs
- a) the influence of each category in the company's revenues and expenses;

	2018	2017

b) new products envisaged for which a substantial amount of assets will be affected in the next financial year as well as the stage of development of these products

PAGINA:10 PAGINI: 28

S.C. "UAMT" S.A. ORADEA

The capacitive analysis of SC UAMT SA highlights the need for investments in modern equipments, SDVs and assembly equipments to support the increase in the expected rate, but also to anticipate potential market-driven "leaps". Apart from the increased production volumes for the Dacia models and other new models launched so far, for our company, the launch of new models in the factory creates the opportunity to diversify the range of UAMT products.

1.1.3. Assessment of the technical and material supply activity (indigenous sources, import sources)

In 2018 the supply activity was based on firm orders with suppliers from Romania, within the U.E. and from outside U.E.

The main suppliers of raw materials and materials of the company according to the share in the volume of supply expenditures for 2017 are presented in the table below.

Furnizor	Pondere în planul de aprovizionare pe 2018+ [%]	Pondere în planul de aprovizionare pe 2017 [%]
Furnizori din România	70%	67%
Furnizori din Uniunea Europeana	23%	30%

Stocks of raw materials and materials are at the minimum. Due to the systematic supply, no gaps are created in the stock of raw materials and materials.

Supply of raw materials is mainly done directly from direct suppliers or distributors, thus negotiating favorable prices for the company. Prices are well correlated with quality.

1.1.4. Valuation of sales activity

a) Description of the evolution of sequential sales on the domestic and / or external market and of medium- and long-term sales prospects:

In 2018, product sales have been increasing compared to 2017.

The main market for the company's products is the car market, accounting for 99% of total sales in 2016.

S.C. "UAMT" S.A. ORADEA

PAGINA:11 PAGINI: 28

Exports are largely intra-Community supplies.

In the medium and long term the company's marketing policy is to maintain traditional customers and to enter new market segments.

b) Description of the competitive situation in the field of activity of the company, the market share of the products or services of the company and of the main competitors;

The general practice in the automotive fitter market is to accommodate several parts and subassemblies supplying companies.

As a result of the very important and long-lasting process of agreement, the notion of competition becomes irrelevant, since the approved firms remain on the market as long as they manage to meet the quality and price requirements of the car installer within the life of vehicle.

In particular, the competition was manifested in the selection of suppliers agreed by DAMA's main client, Dacia-RENAULT, as the products for equipping Dacia vehicles are complex and require high costs for assimilation in manufacturing, validation and assurance of the necessary manufacturing capacities. Once this stage has been overcome, competition has been substantially reduced, with potential suppliers changing only in exceptional cases (bankruptcy, grave quality problems, major innovations, significant price jumps, etc.).

Also, once the company has been nominated as a Renault 1 supplier, it also holds a privileged position in the spare parts market, both in terms of legislative provisions for consumer protection and in terms of product promotion.

In this market segment, however, we are constantly in competition with multinationals in the automotive industry.

c) Description of any significant dependence of the company on a single customer or on a group of clients whose loss would have a negative impact on the company's income;

Dependence on the Dacia-Renault customer was greatly diminished in 2018, and in the coming years this addiction will be further diminished as the Company becomes an

S.C. "UAMT" S.A. ORADEA

PAGINA:12 PAGINI: 28

authorized supplier (or principal or rank 1 or nominated, depending on the car manufacturer whose vendor agrees) of other major car manufacturers.

1.1.5. Evaluating employee / company staff issues

a) Specifying the number and level of training of the company's employees as well as the degree of unionisation of the workforce;

The forecasts for the year 2019 lead to the conclusion that during this period the company will have to carry out its activity with an average number of employees of about 480-500 people determined by the volume of production.

The degree of unionisation of the workforce is about 40%.

The general qualification of the personnel is high, being generally satisfied with the needs of the society and permanently improved by practical actions on operations and products.

The current organizational structure is of a pyramidal type, with the competencies and responsibilities given at different levels being specified by the "Organization and Functioning Regulations" and "Job Forms".

At the end of 2018, compared to 2017, the structure of the employees by type of activity is the following:

	Nr. efectiv de personal 2018 2017		
Total personal producție	385	445	
Personal TESA	103	78	
Total personal	488	523	

From the data presented above, the number of employees in 2018 decreased compared to the previous year.

b) Describe relationships between manager and employees as well as any conflicting elements that characterize these relationships;

Relationships between management and employees are normal, without the collective actions of contesting programs and managerial achievements.

1.1.6. Evaluating issues related to the impact of the issuer's core business on the environment

UAMT SA has the integrated environmental permit and the updated water management permit.

The basic activities of the company have an insignificant impact on air, water, soil. The determinations made show that there are no exceedances of the limit values set by the legislation in force for any of the measured pollutants, both for emissions to air and emissions of pollutants into the atmosphere. By upgrading the wastewater pre-treatment plant all specific pollutants are within the limits set by the legislation. Since the free surface inside the unit is mostly concreted, including industrial waste dumps, there can be no significant changes in the structure and quality of the soil.

According to the above, it appears that the impact of the activities of the AMMAT does not constitute significant pollution.

This is not the case for existing or envisaged litigation regarding violation of environmental legislation.

The annual environmental report for Bih APM for the year 2018 is being prepared and submitted.

1.1.7. Evaluating research and development

SC UAMT SA will continue in 2019 the R & D policy as a prerequisite for consolidating and improving this activity with direct implications on the development possibilities of the company (the portfolio of clients and products, turnover).

1.1.8. Evaluating the business of the company on risk management

Description of the company's policies and objectives regarding risk management.

The 2018 results are relatively good in relation to turnover, due to the measures taken through cost management policies, out of which:

o the continuous development and promotion of products that will lead to increased customer satisfaction in conditions of economic profitability

reducing and optimizing utility consumption

S.C. "UAMT" S.A. ORADEA

PAGINA:14 PAGINI: 28

o the efficient management of the human resource in correlation with the production capacities at the lowest achievable cost

a rhythmic supply and minimal storage of raw materials and consumables

to streamline cash flows through debt and debt settlement measures

o hiring costs in correlation with the timing of revenue in close co-ordination with availability

o hiring maintenance and repair works at advantageous prices

1.1.9. Prospective elements of the company's business

a) Presentation and analysis of trends, elements, events or uncertainty factors affecting or likely to affect the liquidity of the company compared to the same period of the previous year.

We believe that in 2019 we have the possibility of achieving higher incomes than those in 2018. However, given the general rise in raw material prices and inherent wage increases, we estimate a net profit lower than that achieved in 2018, mainly due to:

- the introduction of new products in the factory, from several car manufacturers, which require time to optimize the production process;
- rising raw material prices, utilities and other services provided by third parties
- the substantial increase of the personnel expenses;
- maintaining the actual or modest increase in sales prices of finished products and services provided by the company (at a lower rate than the cost growth rate).
- Continuing the technical updating policy of the company by replacing the equipment that has been overcome morally and technically.
- the implementation of new technologies in order to diversify the production and especially the quality improvement of their own products.

The forecasts for the future in this field are largely influenced by the policy and objectives expressed by car manufacturers that are the company's customers, constantly reducing manufacturing costs for cars in their manufacturing ranges, and the current trend towards electrification of individual car transport.

The economic and financial situation of the company this year had a satisfactory trend.

S.C. "UAMT" S.A. ORADEA

PAGINA:15 PAGINI: 28

The objectives to be achieved through the company's 2018 business plan are:

- Continuing structural adjustment according to the actual dimensions and developments of the current markets of society;
- Continue the structural and technological upgrading of the company to align it with the requirements imposed by motor vehicle installers;
- intensifying efforts to identify and penetrate new external market segments and new products from other areas of activity;
- Continue to re-technologize the company by accessing new government funds for investment;
- Put emphasis on the training of human resources at the level of the current requirements;
- continuing to diversify the portfolio of major clients.
- b) Presenting and analyzing the effects of current or anticipated capital expenditures on the financial position of the company compared to the same period last year.

During 2018, the company continued its investment policy on the basis of the approved modernization project.

The company will continue the modernization process in 2019, reinvesting the proposed profit for distribution to other reverts, respectively to its own sources of financing

2. Tangible assets of the company

2.1. Specification of the location and characteristics of the main production capacities owned by the commercial company.

The company is located in northwestern Romania in the city of Oradea at 8 km from the Romanian-Hungarian border, in the immediate vicinity of the European road E60, with means for supply and delivery on both the railway and the car.

The company is based in Oradea, Uzinelor Street, no. 8, and is registered with the Bihor Trade Register, under the number J 05/173/1991.

PAGINA:16 PAGINI: 28

The technical equipment of the company is located in the field of fine mechanics. The company uses the following categories of technological processes:

- mechanical machining (turning, milling, drilling, leveling and rounding) on classic and specialized CNC machines
- Cold pressing operations;
- injection of plastic parts (polyethylenes, polyacetals, polyamides, including fiberglass reinforcers etc. up to 1.2kg);
- painting through the cataphoresis process;
- electrochemical coatings (galvanizing, nickel-plating);
- metal welding (electric, autogenous, spot welding, CO2 welding, with or without manipulating robots);
- thermal treatments;
- electroerosion machining (with solid and wired electrode);
- product assembly;

The company also has a performance SDV execution section that generally provides all the necessary stamps, dies, devices and verifiers necessary for its own production as well as executing orders in this area for other companies.

2.2. Description and analyze the degree of wear of commercial property.

The average degree of wear is a normal degree in industrial activity. The level of modernity of the machinery is in line with the technical requirements of production.

The Company's accounting policy for revalued tangible assets was the alternative accounting treatment, ie the presentation of fixed assets at the revalued amount in the financial statements, less cumulative depreciation.

2.3. Specifying potential issues related to the ownership of tangible assets of the company.

There are no litigation on issues related to ownership of tangible assets of a company or of a commercial nature.

3.2.. Description of the company's policy on dividends. Specification of the dividends due / paid / accumulated over the last 3 years and, if applicable, the reasons for the possible reduction of dividends over the last 3 years.

S.C. "UAMT" S.A. ORADEA

PAGINA:18 PAGINI: 28

In the last few years, the company did not grant dividends to its shareholders, the profit being distributed to other reserves.

In the last period, the issuer's policy was to reinvest the profits obtained, the company needing capital resources to carry out investments, thus not dividing dividends.

For the year 2017 through the A.G.O.A., the net profit is proposed to be distributed as a source of financing for the support of the company's investment program.

As the provision of medium and long-term capital resources is a major coordinator of the issuer's strategy, it will maintain its policy of reinvesting profits in the future.

In 2018 there were no significant changes in the share capital structure.

Unlike previous years, although the turnover achieved with Dacia - Pitesti customer has a significant share, this share has diminished considerably as the Board of Directors' efforts to expand its portfolio of large clients have been achieved.

The Board of Directors will continue this action in order to mitigate the risks of a single major client.

CAP.5. NON-FINANCIAL DECLARATION

CORPORATE SOCIAL RESPONSIBILITY

Corporate Social Responsibility (CSR) is an essential pillar of society's development as it supports development, innovation and sustainability for both society and stakeholders.

As a participant in the industry, the main mission of the company is to provide the best products, companies and institutions to support the development of their projects. We are also aware of the fact that we live in an ecosystem and, in this sense, we strive to generate a positive long-term impact on the community and the environment.

Therefore, the society is willing to play a role in the evolution of the Romanian society as a whole, carrying out its work with the highest respect of the values and principles of the

ETHICS AND GOVERNANCE, RESPECT OF HUMAN RIGHTS

The Company is committed to maintaining and improving the systems and processes that enable it to ensure respect for human rights in the operations and management of human resources, its supply chain and its products and services.

Society's commitments to human rights are guided by the following conventions, standards and initiatives:

- the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights;
- Fundamental Conventions of the International Labor Organization (ILO), aimed in particular at eliminating forced labor and child labor, discrimination in work, and freedom of association and effective recognition of the right to collective bargaining;
- the United Nations Guidelines on Business and Human Rights;

Company a is determined to act with integrity and in accordance with the applicable laws in all its activities. Several policies developed at group level include provisions that directly or indirectly support human rights.

The company is committed to respecting human rights. This also applies to policies and processes developed by society in connection with its obligations to combat money laundering, terrorist financing and corruption.

CODE OF CONDUCT AND FIGHT AGAINST CORROSION

The company has set the strategic goal of protecting its corporate image and ensuring that every employee acts with integrity in everyday activities. Many efforts have been made in terms of culture and behavior.

The Code of Conduct is the cornerstone of professional ethics within the firm. Promotes respect for human and environmental rights, prevention of conflicts of interest and corruption, fight against money laundering and terrorism financing, market integrity, data protection, adequate behavior in terms of gifts and invitations and responsible supply.

The Code of Conduct is applicable to all employees, regardless of their degree of responsibility, and to all managers.

PAGINA:27 PAGINI: 28

In 2018, the industry continues to undergo profound changes, including customer and stakeholder expectations, the emergence of new technologies and the regulatory framework that transforms businesses and skills to work. For society this opportunity implies the development of employees. Their ability to adapt their skills and working methods is essential for business sustainability.

The corporate culture of the firm is based on the values it promotes to deliver the best customer service (team spirit, innovation, responsibility and commitment), the behavior and skills that it inspires, and the behavior to be followed by those working in these areas.

HUMAN RIGHTS, DIVERSITY, DISCRIMINATION POLICY, GENDER EQUALITY

the general policy of society is to treat everyone, man or woman, with the same respect, giving everyone equal opportunities to be recruited, promoted, rewarded, formed and based only on personal qualities.

Diversity is an important component of the bank's strategy and is based on an efficient performance management system that assures the empowerment of employees from the perspective of competencies

When employing and fixing individual rights, the company ensures equal opportunities and treatment for all employees without discrimination, either directly or indirectly, depending on the criteria of race, color, national origin, ethnicity, religion, social origin, age or union activity, sex, sexual orientation, genetic features, disability, family situation, or liability, or any other criteria that have the purpose or effect of not granting, reducing or canceling the recognition, use or exercise of rights under the collective labor agreement.

Decisions on wages, benefits, training, work assignments, promotions, disciplinary action or dismissal are based solely on employee performance, not on personal characteristics, race, origin, sex, religion, sexual orientation or political opinion. observance of employees' dignity - regarding the elaboration of the collective labor contract and the internal regulations of the bank, the aim is to ensure adequate working conditions for the activity and in terms of social protection, health and safety in the workplace, as well as observance of the dignity and consciousness of the employees.

For all employees, the following are recognized:

- the right to collective bargaining;
- the right to protection of personal data;

- the right to protection against illegal redundancy;

- the right to protection against all forms of harassment;

- other rights provided by the legislation in force

CLIMATE CHANGE

In the face of climate change and ecological change, maintaining the ecological balance becomes a real challenge. The company has specific internal procedures and tools for waste management and ensures that they are respected. The development programs aim at reducing energy consumption, aiming to constantly reduce CO2 emissions from their own activities.

The basic activities of the company have a minor impact on the environmental factors (air, water, soil), and the determinations made show that there are no exceedances of the limit values provided by the legislation in force for any of the measured pollutants.

The company does not have data on the current and foreseeable impact of its operations on the environment and can not estimate the impact on health and safety. However, the existence of the updated Integrated Environmental Authorization ensures that we comply with the legal conditions of operation and management of the above aspects at the company level.

The company can not estimate the impact on climate change of the use of goods produced by society. By the nature of the industry in which the company operates, this impact has to be studied at the level of the entire industry.
